Subject Index of Vol. 37

backward pumping screws, 37
boundary fitted curvilinear coordinates (BFCC), 139
boundary integral, 157, 379
bubbles, 1

change of type, 297, 347
coalescence, 1
complex channels, 139
composite, 379
computer simulation, 233
constitutive equations, 281
contraction flow, 281
cork flow, 55
creeping flow, 157

dilute polymer solution, 157, 347
Doi–Edwards model, 265
drainage, 201, 209

electrorheology, 233
elongational flow, 157
extensional viscosity, 281
extrudate shrinkage, 95
extrudate swell, 95
extrusion, 55

falling-ball rheometry, 317
fiber suspensions, 317
fibre reinforcement, 379
films, 201, 209
finite difference, 201
finite element method, 317
flow instabilities, 55
flow visualization, 175
fluorescence, 209
forward pumping screws, 37

high Deborah number, 157
high shear-rate expansion, 265

inertial flow, 281
instantaneous recovery, 265
interfacial stability, 19

laser interferometry, 209
low shear-rate expansion, 265

micromechanical approach, 113

non-Newtonian flow, 297
non-Newtonian fluids, 175
numerical simulation, 139, 281, 297
numerical study, 19

parallel flows, 19
polymer flow, 297
polymers, 55
power law, 37

reattachment length, 175
relaxation, 347
reptations, 113
reptation model, 265
rheological constitutive equations, 113
rheology of polymeric liquids, 113
rubber–carbon black compound, 95

slip, 55
squeezing flow, 379
start-up, 201
streamline integration, 317
strong flows, 113
sudden expansion, 175

twin-screw extruders, 37
two phase flow, 19
two-dimensional flow, 139

viscoelastic flow, 139, 297
viscoelastic flow past cylinder, 347
viscoelastic fluids, 1
viscoelasticity, 175
vorticity shock, 347

wave propagation, 347

yield stress, 233

Subject Index of Vol. 37
